Introduces Drops, A Limited-Edition Feature

Product Teardown

How it works?

- Swiggy collaborates with partner restaurants to curate exclusive, limited-edition dishes that aren't part of the regular menu.
- The official drop date and time are announced in advance via Swiggy's social media platforms, directing traffic to the app.
- Users can pre-book their orders or join a waitlist if the item becomes temporarily unavailable due to high demand.
- As the drop approaches, Swiggy sends out reminders through push notifications and WhatsApp to keep customers informed.
- All orders are fulfilled on a first-come, first-served basis, creating a sense of thrill and exclusivity for users.

How the company works

2013: Sriharsha Majety, Nandan Reddy, and Rahul Jaimini founded Swiggy.

2014: Swiggy launched its food delivery platform in Bengaluru.

2015: Swiggy raised $80 million in funding and partnered with over 100 restaurants, delivering over 70,000 orders per month.

2016: Swiggy focused on cutting costs and strengthening its logistics network.

2017: Swiggy invested in core engineering, automation, data sciences, and machine learning.

2018: Swiggy achieved unicorn status, securing funding from global investors and expanding operations.

2019: Swiggy clocked around 1.4 million orders per day, extended its delivery team, and partnered with 1,30,000+ restaurants across 325+ cities.

2020: Swiggy launched Instamart, entering the quick-commerce market with grocery delivery.

2022: Swiggy introduced Swiggy One, an all-in-one subscription plan.

2025 (Present): Swiggy continues to be a dominant force in the food delivery and quick-commerce market, with a strong focus on expansion and innovation.

Target user segment and their persona for Drops

Targeted Users

- **Primary Target:** Urban millennials & premium foodies (they have money, taste, and social reach).
- **Secondary Target:** Curious explorers and trend-driven consumers (drive word-of-mouth and spike traffic).
- **Cross-sell Target:** Swiggy One users who can be nudged toward high-margin Drops.

Segment Size & Potential Impact

- **Market Size:** Swiggy's core demographic (**urban millennials and Gen Z**) makes up a significant portion of its **50+ million user base**. This segment is concentrated in **metro and tier-1 cities**, where demand for premium and exclusive experiences is highest.
- **Engagement Potential:** **Early Drops** campaigns saw over **100 orders in the first 10 minutes** and a **58% increase in orders** for participating restaurants, indicating high responsiveness and viral potential.
- **Growth Opportunity:** With India's online food delivery **market continuing to expand** and a growing appetite for premium, social, and experiential consumption, the **Drops** feature can **deepen loyalty** among high-value users and attract new, experience-driven customers.

Customer Segment Analysis

Segment	Age Group	Location	Key Characteristics	Needs & Motivations	Why Swiggy Drops Appeals to Them
Urban Millennials	25–40	Tier 1 & 2 cities	Tech-savvy, busy professionals, disposable income	Convenience, novelty, premium experiences	Offers exclusive, time-limited food options
Gen Z Foodies	18–25	Metro & college towns	Social media active, trend-sensitive, adventurous	Unique experiences, social sharing, FOMO	Enables access to viral, limited-edition meals
Affluent Young Families	28–40	Urban centers	Dual-income, value convenience & quality	Hassle-free premium dining at home	Curated drops reduce decision fatigue
Food Influencers	20–35	Pan-India	Content creators, early adopters, networked	Exclusive content, social status, discovery	Provides unique content for their audience
Culinary Enthusiasts	25–45	Metro cities	Passionate about food, seek new flavors	Access to chef specials, rare cuisines	Access to chef collaborations & rare dishes
Brand Loyalists	20–45	Urban & semi-urban	Regular Swiggy users, value loyalty programs	Recognition, rewards, early access	Priority access to exclusive drops

Impact Analysis

- **Customer Loyalty:** By offering exclusivity and early access, Drops can increase retention among Swiggy's most valuable users.
- **Brand Differentiation:** The feature sets Swiggy apart from competitors by transforming food delivery into a culturally relevant, shareable experience.
- **Revenue Upside:** Limited-edition, premium offerings can drive higher order values and frequency, especially among users willing to pay for unique experiences

User Personas

Rohan Mehta

32-year-old, Mumbai, software developer, Demanding job and a hectic schedule, Values convenience and curated experiences

Personality: Efficient, pragmatic, quality-conscious, and a bit introverted.

Interests: Tech gadgets, productivity hacks, gourmet food, and Netflix.

Pain Points: Lacks time to browse endless menus; often ends up ordering the same food; wants to avoid decision fatigue.

Behavior: Orders meals during workdays, prefers platforms that simplify choices, and values reliability.

Motivations: Seeks hassle-free, high-quality meals that feel special without extra effort

Goals: To enjoy premium dining experiences at home with minimal decision-making.

Aditi Sharma

27-year-old, Bengaluru, marketing professional, loves exploring new restaurants, on the lookout for the next big food trend

Personality: Outgoing, adventurous, social,and digitally savvy.

Interests: Food trends, social media, urban events, and culinary experimentation.

Pain Points: Gets bored with repetitive food options; finds it hard to choose from endless menus; craves unique experiences.

Behavior: Orders food online 4–5 times a week, follows food influencers, and frequently posts food stories on Instagram

Motivations: Wants to be among the first to try new and exclusive dishes; enjoys the buzz of limited-time offers.

Goals: To discover & share unique dining experiences with her friends and followers.

Priya Singh

24-year-old, Delhi, food and lifestyle influencer, Large following on Instagram and YouTube, Reviews new food trends and exclusive launches

Personality: Creative, expressive, ambitious, and highly social.

Interests: Content creation, photography, food styling and networking.

Pain Points: Needs fresh, exclusive content to engage her audience; finds most delivery options too mainstream; craves experiences that set her apart from other influencers.

Behavior: Actively seeks out limited-edition food experiences, collaborates with brands, and shares reviews and unboxings online.

Motivations: Wants to grow her follower base by being the first to showcase unique offerings.

Goals: To be recognized as a trendsetter and source of exclusive recommendations.

User Journey Mapping

Stage	User Actions	Touchpoints	Emotions/Thoughts	Pain Points Addressed/ Experienced
Discovery	Notices Swiggy Drops via app notification or social media ad	App notification, Instagram, email	Excited, curious, FOMO (“I want to try this!”)	Hard to find new/unique food experiences
Consideration	Browses Drop details, checks exclusivity, reads reviews	Swiggy app, Drop landing page	Intrigued, evaluating (“Is this worth it?”)	Overwhelmed by options, wants curated choices
Decision	Adds Drop item to cart, asks friends, checks price	App cart, WhatsApp/social sharing	Anticipation, hesitation (“Should I buy?”)	Fear of missing out, price sensitivity
Purchase	Completes payment, selects delivery slot	Swiggy checkout, payment gateway	Satisfaction, excitement (“I got it!”)	Checkout friction, payment failures
Waiting/Delivery	Tracks order, shares anticipation online	Order tracking, push notifications	Impatience, excitement (“Can’t wait to try!”)	Delivery delays, lack of real-time updates
Consumption	Receives and tries the exclusive Drop, takes photos	Home, Swiggy delivery, social media	Delight, pride,validation (“This is special!”)	Quality mismatch, food not as expected
Post-Order	Shares review, posts on social, gives feedback	Swiggy app, Instagram, feedback form	Accomplished,influential (“Look what I got!”)	No easy way to share, lack of recognition

Key learnings and Takeaways from Swiggy Drops

UX Principles

- **Simplicity & Clarity:** Swiggy's interface prioritizes clear, intuitive navigation and upfront access to important features, reducing cognitive load and making it easy for users to discover and order from Drops.
- **Seamless Experience:** The design aims for a frustration-free, smooth flow from discovery to checkout, minimizing steps and friction points.
- **Personalization:** Recommendations and notifications are tailored based on user preferences and behaviors, increasing relevance and engagement.
- **Visual Appeal:** High-quality, bold visuals are used to make exclusive Drops enticing and to enhance the "eat with your eyes first" experience.
- **Error Prevention & Recovery:** Proactive guidance and clear error messages help prevent mistakes and guide users back on track if issues arise, improving trust and satisfaction.
- **Accessibility:** Responsive layouts and accessible design standards ensure usability for a wide range of users.

Growth Principles

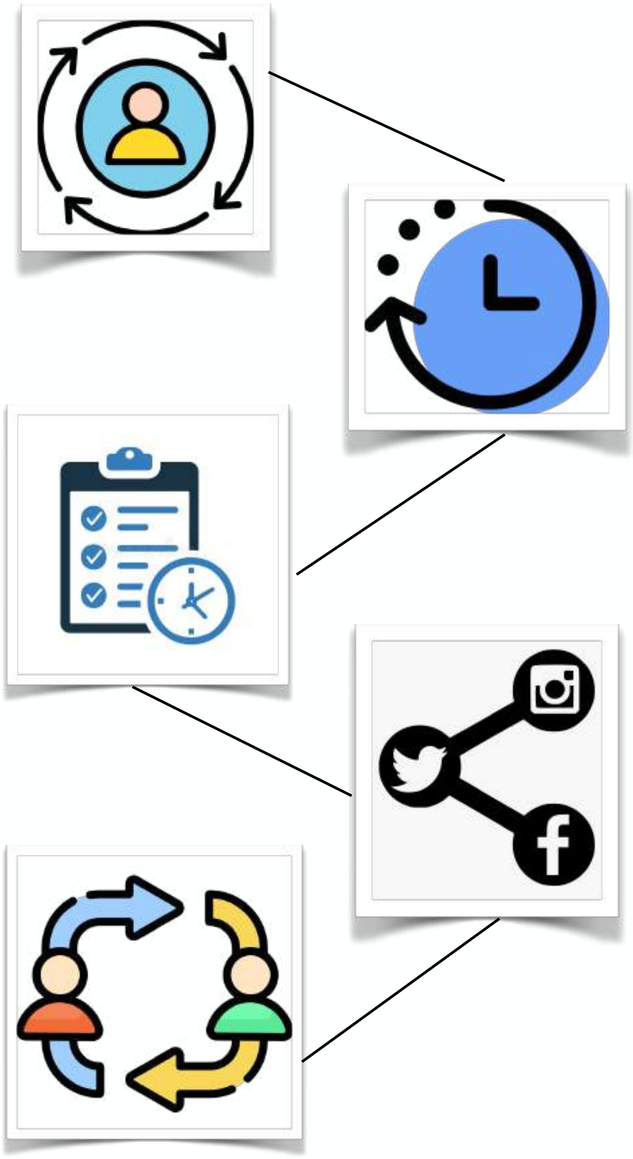

- **Scarcity & Exclusivity:** Limited-time Drops create urgency and FOMO (fear of missing out), driving rapid engagement and higher conversion rates.
- **Social Sharing:** Features encourage users to share their exclusive experiences, leveraging organic word-of-mouth and social proof for viral growth.
- **Cross-Selling & Loyalty:** Integrating Drops with loyalty rewards and other Swiggy services increases user retention and lifetime value.
- **Continuous Feedback Loops:** Regular user testing, analytics, and feedback analysis are used to refine features and improve user satisfaction over time.
- **A/B Testing & Experimentation:** Swiggy employs agile development and experimentation to quickly iterate on new features and optimize for user preferences.

Design & Technical Takeaways

- **Build for Muscle Memory:** Repetitive tasks are designed for efficiency, with key actions surfaced up front for quick access, especially for frequent users.
- **Separation of Concerns:** Modular design and clear separation of responsibilities in both UI and backend make scaling and maintaining features easier.
- **Scalability & Stability:** Robust architecture ensures that new features like Drops can handle high traffic and maintain performance during peak demand.

Recommendations to improve

Area	Improvement Idea	Rationale & Benefit
Personalization	Use AI to recommend Drops based on user taste, past orders, and dietary preferences.	Increases relevance, engagement, and conversion by showing users the Drops they're most likely to love.
Live Drop Countdown	Add a dynamic countdown timer and real-time slot availability for each Drop.	Creates urgency and excitement, encouraging faster decision-making and purchases.
Seamless Waitlist	Allow users to join a waitlist with one tap and get instant notifications if a slot opens up.	Reduces frustration, increases hope of participation, and keeps users engaged even if Drops sell out.
Social Sharing	Make it easy to share Drops on WhatsApp/ Instagram and reward both referrer and referee.	Amplifies organic reach, creates buzz, and incentivizes viral growth.
Feedback Loop	Prompt users for instant emoji or star feedback after trying a Drop, with an option to leave a quick review.	Gathers actionable insights for continuous improvement and increases user involvement.

Metrics

Metric	What It Measures	Why It Matters
Gross Order Value (GOV)	Total monetary value of all Drop orders (before discounts/ taxes)	Indicates revenue scale and user willingness to pay premium
Number of Drop Orders	Total completed orders from Drops	Tracks adoption and popularity of the feature
Average Order Value (AOV)	GOV divided by number of Drop orders	Measures upsell effectiveness and premium positioning
Conversion Rate	% of users who view a Drop and complete a purchase	Reflects appeal and ease of the Drop experience
User Engagement	Number of unique users participating in Drops, repeat purchase rates	Shows stickiness and retention impact
Time to Sell Out	How quickly Drop inventory is exhausted	Captures urgency, demand, and FOMO effectiveness
Social Shares/Referral Rate	Number of times Drops are shared or referred via social platforms	Indicates organic growth and social currency
Customer Satisfaction (NPS/ CSAT)	Post-Drop ratings and feedback	Measures user delight and areas for improvement
Churn/Retention Rate	% of Drop users who return for future Drops or regular orders	Assesses long-term loyalty impact
Incremental Revenue/Uplift	Additional revenue generated by Drops vs. baseline	Quantifies business impact and ROI

THANK YOU!

Swiggy Karo, Phir Jo Chahe Karo!
